*from organic production

Preparation Guide

Choose the amount of water and cereal powder according to the feeding guide and depending on your baby's age and appetite.

1 Boil fresh drinking water and allow it to cool down to about 50 °C.

2 Put the recommended amount of powder (according to feeding guide) into a bowl.

3 Measure boiled water (according to feeding guide), add to the powder and stir.

4 Leave to stand to thicken until it reaches the desired consistency. Check the temperature.

Feeding Guide

Each baby is different, so daily milk cereal portions may differ greatly. Our feeding guide shall help you prepare different amounts of milk cereal correctly.

	Powder (g)	Water (ml)	Portion (g)
from 4 months	40 (3-4 tablespoons)	130	170
from the 6 th month	45 (approx. 4 tablespoons)	140	185
from the 8 th month	50 (4-5 tablespoons)	155	205

This milk cereal is an ideal evening meal for babies receiving weaning food. It is suitable from 4 months to complement breastfeeding or to complement bottled infant formula.

Important information

- It is important for your baby's health that you follow the instructions carefully and adhere to the indicated quantities when preparing their cereal.
- Always feed the cereal from a spoon and prepare it freshly each time.
- Close the opened sachet tightly after each use, store in a dry and hygienic place at room temperature and use up within 3-4 weeks.
- Please do not warm up the cereal in the microwave (risk of scalding).
- Please make sure to brush your baby's teeth regularly after they get their first tooth.

Ensure a balanced, varied diet and a healthy lifestyle for your baby.
